

IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application. An identifier indicating the status of each claim is provided.

Listing of Claims:

1. (Currently Amended) An electronic-program-guide retrieval method comprising the steps of:

~~when retrieval based on an input retrieval keyword is performed by accessing an~~
electronic-program-guide database storing electronic-program-guide data based on an input
retrieval keyword:[,]

extracting relevant-keyword information relevant to said input retrieval keyword from a dictionary database; and

~~extracting~~ downloading only desired necessary electronic-program-guide data based on the extracted relevant-keyword information from the electronic-program-guide data stored in said electronic-program-guide database and the input retrieval keyword.

2. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein said dictionary database stores words to be used as retrieval keywords, and relevant keywords relevant to said words to be used as retrieval keywords.

3. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein when the retrieval keyword is the name of a person, the relevant-keyword information is one of or a combination of a nickname of said person, the full name of

said person, the given name of said person, the name of a group relevant to said person, and another well-known name of said person.

4. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein when the retrieval keyword is a word written in hiragana characters and/or katakana characters used in Japanese writing, the relevant-keyword information includes a word written in kanji characters used in Japanese writing or in characters relevant to said kanji characters.

5. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein when the retrieval keyword corresponds to one of misused character keywords stored in a misused keyword database which are caused by possible input mistakes, only the relevant-keyword information is used to perform retrieval.

6. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein the retrieval keyword and the relevant-keyword information are interrelated to each other.

7. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein when part of a word to be used as the retrieval keyword is input, said word to be used as the retrieval keyword and the relevant-keyword information are extracted from a retrieval-keyword database storing previously input keywords in a predetermined order.

8. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 1~~ claim 1, wherein when the retrieval keyword belongs to a particular genre, the relevant-keyword information belongs to a genre different from said particular genre.

9. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 8~~ claim 8, wherein when the particular genre is relevant to cooking, the different genre is relevant to cooks.

10. (Currently Amended) An electronic-program-guide retrieval method according to ~~Claim 8~~ claim 8, wherein when the particular genre is relevant to place names, the different genre is relevant to one of or a combination of neighboring city names, country names, and regional names.

11. (Currently Amended) An electronic-program-guide retrieval system comprising:
a data server including an electronic-program-guide database storing program
information of an electronic program guide;

a client module comprising access means for accessing said electronic-program-guide
database and input means for inputting a retrieval keyword for retrieving the program
information; and

a dictionary database for storing retrieval keywords and relevant keywords relevant to
said retrieval keywords;

wherein relevant-keyword information relevant to the retrieval keyword input by said
client is extracted from said dictionary database, and selective retrieval by accessing only the

program information related to is performed based on the extracted relevant-keyword
information and the input retrieval keyword is performed.

12. (Currently Amended) An electronic-program-guide retrieval system according to
~~Claim 11~~ claim 11, wherein said dictionary database is provided at the client side.

13. (Currently Amended) An electronic-program-guide retrieval system according to
~~Claim 11~~ claim 11, wherein said dictionary database is provided at the data server side.

14. (Currently Amended) An electronic-program-guide retrieval system according to
~~Claim 11~~ claim 11, wherein said client downloads and stores the program information.

15. (Currently Amended) An electronic-program-guide retrieval system according to
~~Claim 11~~ claim 11, wherein said client accesses a necessary part of said data server via a routing
server storing information on routes to the parts of said data server.

16. (Currently Amended) An electronic-program-guide retrieval system according to
~~Claim 11~~ claim 11, wherein:

said dictionary database stores misused keywords caused by possible input mistakes; and
when the input keyword corresponds to one of the misused keywords, only the relevant-
keyword information is used to perform retrieval.

17. (Currently Amended) An electronic-program-guide retrieval system according to ~~Claim 11~~ claim 11, wherein when the retrieval keyword is a word written in hiragana characters and/or katakana characters used in Japanese writing, the relevant-keyword information includes a word written in kanji characters used in Japanese writing or in characters relevant to said kanji characters.

18. (Currently Amended) An electronic-program-guide retrieval system according to ~~Claim 11~~ claim 11, wherein said dictionary database stores previously input keywords so that the input keywords are included in the relevant-keyword information, and the stored keywords are arranged in order of frequency of use.

19. (Currently Amended) An electronic-program-guide retrieval system according to ~~Claim 11~~ claim 11, wherein the program information includes data relevant to movie information.

20. (Currently Amended) An electronic-program-guide retrieval system according to ~~Claim 11~~ claim 11, wherein the program information includes data relevant to drama information.

21. (Currently Amended) An electronic-program-guide retrieval system according to ~~Claim 11~~ claim 11, wherein the program information includes data relevant to place names.

22. (Currently Amended) An electronic-program-guide retrieval system according to ~~Claim 11~~ claim 11, wherein the program information includes data relevant to the names of dishes.
